Applicant's amendment to the specification on page 20 is entered.

Applicant's amendment to page 3 of the specification is not entered because, while the amendment to correct the typographical error is acceptable, the paragraph contains a 19-mer sequence, gcttggagctocagca gct, which is not identified by SEQ ID No. It is not clear if this sequence was given a SEQ ID No. and this paragraph of the specification amended during prosecution of the application. Applicant is requested to include a SEQ ID No. for the 19-mer and include this sequence in the sequence listing.
